Drink Choice

For a delicious and refreshing ice cold canned drink, this feature packed fully automatic machine offers a wide choice of 5 selections from a huge total capacity of 135 cans.

Simple Operation

Drink selection is simplicity itself by simply pushing the desired product, all of which are displayed in high visibility clear display windows, enabling easy and fast product change and providing maximum brand impact. The chosen can is delivered at waist height, preventing the need to reach down to floor level as with other machines.

Temperature Control

Fully electronic control of the refrigeration system ensures that cans are delivered at the perfect temperature, which is digitally programmable and hence easy to adjust to individual users requirements. Full auto defrost and self-test systems are built in for minimal fuss.

Coin Control

The IceBreak is available for either slave or stand-alone use. Its compact, half-height design perfectly accommodates the user's choice of hot drinks machine on top, which then provides a superb hot and cold total refreshment solution. When used as a slave, the coin mechanism on the host machine is used to operate the IceBreak, thereby eliminating the need for a separate mechanism with the obvious cost savings and cash management advantages. Alternatively, the IceBreak can be fitted with a full electronic coin mechanism of its own for entirely stand alone operation.

Other Features

Digital display with scrolling messages and full audit facility to monitor the quantity and value of cans taken. Interfaces perfectly with a large choice of compatible hot drinks machines. Individual prices can be set for all selections. Electronic temperature control and auto-defrost. Chosen item is delivered at waist height. Incredibly user-friendly, high capacity and feature packed.

Chosen can delivered at convenient height

I-Key cashless payment system compatible (when partnered with host machine)

Huge capacity of 135 cans

The IceBreak is the perfect choice to partner with a hot drinks machine and provides a cost effective, highly convenient and reliable solution to cold drinks requirements. Incredibly simple to operate, the user simply pushes the can of their choice, which is then delivered ice cold and at waist height.

Total Design and Manufacture

Capacity

- Selections : 5
- Can capacity : 27 per selection = 135 cans total (plus one of each in display windows)

Weight

- Empty machine : 112kg

Coin Control

- Available in either slave format, which can be used as either a free vend machine, or to be interfaced with a compatible hot drinks machine, or in stand alone format when fitted with full electronic coin mechanism which accepts all coins and token
- Accumulated credit allows multiple vends to be made
- Free vend override switch
- I-Key cashless payment system compatible when hosted by compatible hot drinks machine

Compatible Machines

- Encore Auto (when fitted with extended drip tray)
- 1066 Auto • Refresh 700 • Style 5

Dimensions (W x H x D)

- Machine : 780mm x 960mm x 685mm (similar height to hot drinks machine base cabinet, which can be eliminated when the IceBreak is used as a slave)

Power Requirements

- 220-240 V, 50 Hz, single phase
- 120 W, 13 A plug fuse
- 2 A fuse on back panel
- Machine is fitted with a 1.8 metre mains lead and power outlet for optional hot drinks machine (combination requires only one wall socket)

Options

- Full electronic coin mechanism which accepts all coins and token
